How to Order
All subscriptions are on a calendar-year basis. Back issues will be mailed on orders received after January 1. Prior year print subscriptions will be charged at the current year's prices. Subscriber numbers (when known) should be used on all orders, inquiries, and correspondence. If an order is to be billed, it must be accompanied by a purchase order. SIAM accepts VISA, MasterCard, and American Express, as well as checks. Payments may also be made by wire transfer to SIAM’s bank. Contact SIAM Customer Service to get bank information for wire transfer payment.

Send orders and correspondence to:
SIAM
3600 Market Street, 6th Floor
Philadelphia, PA 19104-2688
USA
Fax +1-215-386-7999
E-mail subscriptions@siam.org
Or call +1-215-382-9800
1-800-447-SIAM (USA/Canada)

Complete ordering information, editorial boards and editorial policies, and information about optional air freight and photocopying of articles are available at www.siam.org/journals/subscribe.php.

1-800-447-SIAM
(U.S. and Canada)
fax: 1-215-386-7999
e-mail: service@siam.org

All SIAM print journals are produced in the USA on acid-free paper and meet the ANSI requirements for permanence.

SIAM JOURNALS
Your Link to the World of Applied Mathematics

SIAM Journals Online (SJO), articles published 1997 to Present
http://epubs.siam.org
SIAM’s electronic journals offer full-text articles in PDF format for subscribers; the tables of contents and abstracts can be searched and browsed free of charge by anyone with Web access.

Locus, articles published 1953–1996 (archives)
Perpetual access to Locus is available to institutions for a one-time fee (non-member $4,710; member $3,820). A $125 annual maintenance fee begins in year two. Institutions may also subscribe to Locus (non-member $1,250/annually; members $1,000/annually). For ordering information, please see www.siam.org/journals/subscribe.php.

Pairing Locus with a subscription to SIAM Journals Online provides you with immediate, uninterrupted access to all SIAM journal content published from the beginning (1953).

Portico
SIAM has partnered with Portico (www.portico.org) to provide a reliable means to secure post-cancellation access.

Important Subscription Information
List prices enable access to the SIAM Journals Online (SJO) electronic editions, from 1997 forward (19 years of research!). Corresponding print issue subscriptions are available for an additional fee.

A completed and signed Online Journal Subscription Agreement (available at www.siam.org/journals/ojsa.php) must be on file before an institution will receive electronic access.

Individual access is by ID and password. Institutional subscribers access journals by IP address.

Editorial board listings reflect members at the time this catalog was published and are subject to change.

Trial Subscriptions: Free 30-day trial access is available to institutions considering subscribing; please contact subscriptions@siam.org.

Replacement Policy: Claims for missing print issues must be made in writing within six months of the publication date.

Cancellations: Subscription cancellations will not be eligible for refunds after March 1 of the subscription year.

Refunds: The number of issues which have been mailed at the single-copy cost will be prorated. Journals cannot be returned.

Back-Volumes: For orders and inquiries, contact SIAM Customer Service or go to www.siam.org/journals/back.php.

New customers in Australia, China, Hong Kong, India, Indonesia, Malaysia, Philippines, Romania, Singapore, Taiwan, Thailand, and Vietnam can order locally through SIAM’s exclusive agent, iGroup. To get started, send an e-mail to Stanley Tan at stanley.tan@igroupnet.com.

New customers in Latin America and the Caribbean can order locally through ITMS/Systems Link International. Those who are interested in more information or free trial access can contact Edgardo Celis at edgardo.celis@itmsgroup.net.

SIAM REVIEW
The Flagship Journal of the Society for Industrial and Applied Mathematics

SIAM Review consists of five sections, all containing articles of broad interest. Survey and Review features papers with a deliberately integrative and up-to-date perspective on a major topic in applied or computational mathematics or scientific computing. Research Spotlights publishes research or software papers in applied and computational mathematics that will appeal to SIAM Review’s diverse audience. An article could take a non-traditional form such as a mini-survey or timely communication. SIGEST highlights a recent paper from one of SIAM’s specialized research journals, chosen on the basis of exceptional interest to the entire SIAM community and revised and condensed as needed for greater accessibility. Education consists primarily of individual modules that are self-contained presentations of specific topics in applied mathematics, scientific computation, or their applications; each module provides the primary material needed to teach a given topic as well as supplementary material. The Book Reviews section contains a featured review that provides an overview of several books in a subject area. Shorter reviews of individual books are also included.

SIAM Journal on
APPLIED DYNAMICAL SYSTEMS
Communicating and Visualizing Dynamics

SIADS publishes research articles on the mathematical analysis and modeling of dynamical systems and its application to the physical, engineering, life, and social sciences. Submitted articles contribute to the theory of dynamical systems, to the understanding of dynamical systems phenomena through experiment or numerical simulation, or to the use of dynamical systems methods in applications. Contributions can be of a theoretical, computational, or experimental nature.

SIAM Journal on
APPLIED MATHEMATICS

Solving Scientific Problems
with Mathematical Methods

Contains research articles that treat scientific problems using methods that are of mathematical interest. Subject areas include the physical, engineering, financial, and life sciences. Examples are problems in fluid mechanics, solid mechanics, elasticity, electromagnetic theory and optics, mathematical biology, linear and nonlinear wave propagation, inverse problems, nonlinear dynamics, stochastic processes, signal processing, and image processing. Mathematical techniques include asymptotic methods, bifurcation theory, dynamical systems theory, and probabilistic and statistical methods.

SIAM Journal on COMPUTING
Applying Mathematical Principles to Computing Applications

Provides coverage of the most significant work taking place in the mathematical and formal aspects of computer science and nonnumerical computing. Topics include but are not limited to analysis and design of algorithms, algorithmic game theory, data structures, computational complexity, computational algebra, computational aspects of combinatorics and graph theory, computational biology, computational geometry, computational robotics, the mathematical aspects of programming languages, artificial intelligence, computational learning, databases, information retrieval, cryptography, networks, distributed computing, parallel algorithms, and computer architecture.

CONTROL and OPTIMIZATION
Capturing Examples in Mathematical Control

Contains research articles on the mathematics and applications of control theory and on those parts of optimization theory concerned with the dynamics of deterministic or stochastic systems in continuous or discrete time or otherwise dealing with differential equations, dynamics, infinite-dimensional spaces, or fundamental issues in variational analysis and geometry.

SICON treats the mathematical foundations of control and optimization as well as disciplines like mathematical finance that these have spawned.

FINANCIAL MATHEMATICS
Theoretical Developments and Computational Challenges in Financial Mathematics

Brings together works on theoretical developments in financial mathematics as well as breakthroughs in the computational challenges they encompass. By publishing papers of high quality and originality, it serves as an essential resource for academic finance researchers and practitioners alike. The journal offers a conduit for the publication of articles in any of these branches of financial mathematics. It also provides a common platform for scholars interested in the mathematical theory of finance as well as practitioners interested in rigorous treatments of the scientific computational issues related to implementation.

On the theoretical side, the journal seeks papers with demonstrable mathematical developments motivated by models of modern finance. On the computational side, it publishes works introducing new methods and algorithms representing significant (as opposed to incremental) improvements on the existing state of affairs of modern numerical implementations of applied financial mathematics.

Information about editorial policy, peer review, manuscript submission, and production is available at http://www.siam.org/journals/sifin.php or email sifin@siam.org.

This all-electronic journal covers all areas of imaging sciences, broadly interpreted. Manuscripts published in SIIMS include formal approaches, at the level of mathematics and/or computations, as well as state-of-the-art practical results. SIIMS provides a broad authoritative source for fundamental results in imaging sciences, with a unique combination of mathematics and applications. SIIMS is mathematically and computationally based, and offers a unique forum to highlight the commonality of methodology, models, and algorithms among diverse application areas of imaging sciences.

SIIMS covers a broad range of areas, including but not limited to image formation, image processing, image analysis, computer graphics, computer vision, visualization, image understanding, pattern analysis, machine intelligence, remote sensing, geoscience, signal processing, medical and biomedical imaging, and seismic imaging.

MATHEMATICAL ANALYSIS

Using Mathematical Methods and Innovative Analytical Techniques

Features research articles of the highest quality employing innovative analytical techniques to treat problems in the natural sciences. Every paper has content that is primarily analytical and that employs mathematical methods in such areas as partial differential equations, the calculus of variations, functional analysis, approximation theory, harmonic and wavelet analysis, or dynamical systems. Additionally, every paper relates to a model for natural phenomena in such areas as fluid mechanics, materials science, quantum mechanics, biomathematics, and mathematical physics, or to the computational analysis of such phenomena.

MATRIX ANALYSIS and APPLICATIONS

Researching Applications in Numerical Linear Algebra

Contains research articles in matrix analysis and its applications and papers of interest to the numerical linear algebra community. Applications include such areas as signal processing, systems and control theory, statistics, Markov chains, and mathematical biology. Also contains papers that are of a theoretical nature but have a possible impact on applications.

SIAM Journal on
OPTIMIZATION

Linking Optimization Applications, Algorithms, Software, and Computational Practice

Contains research articles on the theory and practice of optimization. The areas addressed include linear and quadratic programming, convex programming, nonlinear programming, complementarity problems, stochastic optimization, combinatorial optimization, integer programming, and convex, nonsmooth and variational analysis. Contributions may emphasize optimization theory, algorithms, software, computational practice, applications, or the links between these subjects.

Computational Results for Scientific and Engineering Problems

Contains research articles on numerical methods and techniques for scientific computation. Papers address computational issues relevant to the solution of scientific or engineering problems and include computational results demonstrating the effectiveness of the proposed techniques.

There are three distinct sections in each issue. Authors should state at submission which of the categories their works fits best.

The sections are:

**Methods and Algorithms for Scientific Computing.** Papers in this category may include theoretical analysis, provided that the relevance to applications in science and engineering is demonstrated. They should contain meaningful computational results and theoretical results or strong heuristics supporting the performance of new algorithms.

**Computational Methods in Science and Engineering.** Papers in this section will typically describe novel methodologies for solving a specific problem in computational science or engineering. They should contain enough information about the application to orient other computational scientists but should omit details of interest mainly to the applications specialist.

**Software and High-Performance Computing.** Papers in this category should concern the novel design and development of computational methods and high-quality software, parallel algorithms, high-performance computing issues, new architectures, data analysis, or visualization. The primary focus should be on computational methods that have potentially large impact for an important class of scientific or engineering problems.

UNCERTAINTY QUANTIFICATION
Mathematical, statistical, algorithmic, and application advances in uncertainty quantification and related fields

Publishes research articles presenting significant mathematical, statistical, algorithmic, and application advances in uncertainty quantification and related fields such as sensitivity analysis, model validation, model calibration, data assimilation, and code verification. The journal also solicits papers describing new ideas that could lead to significant progress in methodology for uncertainty quantification as well as review articles on particular aspects. The journal is dedicated to nurturing synergistic interactions between the mathematical, statistical, computational, and applications communities involved in uncertainty quantification and related areas.

Copublished by:
MMS features research articles that focus on the fundamental modeling and computational principles underlying various multiscale methods. Multiscale modeling is highly interdisciplinary, with developments occurring independently across fields. Research papers and survey articles that augment the fundamental ways we model and predict multiscale phenomena are featured. Particularly emphasized is the interplay between analysis and modeling, modeling and simulation, and mathematics and various applications. Papers bridge the gap in multiscale research between mathematics and various application disciplines, including biology, chemistry, engineering, environmental science, fluid dynamics, geophysics, information science, materials science, and physical science.

SIAM INSTITUTIONAL MEMBERSHIPS

More than 400 colleges, universities, corporations, and research and government laboratories throughout the world are institutional members of SIAM, providing a valuable service to the applied mathematics communities and enjoying a wide range of benefits. Joining SIAM demonstrates the importance that an organization attaches to industrial and applied mathematics and computational science.

SIAM Academic Members
Degree-granting institutions that wish to be affiliated with SIAM as a member are eligible for Academic Membership. Departmental memberships are available for smaller institutions that offer Master’s and undergraduate degrees in mathematics or a related science.

Members receive:
• Public acknowledgment of your support in SIAM media, publications, and brochures, and in every print issue of SIAM’s journals.
• Discounts on subscriptions to SIAM’s prestigious journals. Choose from either a customized or a predetermined package of journals, which provide your institution with significant savings over regular subscription prices.
• Discount on Locus, SIAM’s online journal backfile archive.
• Free student memberships for graduate (Master’s and Ph.D.) and undergraduate students.
• Additional free SIAM News subscriptions.
• Up to 30% discount on all SIAM book purchases.

More information about Academic Membership, including a list of current SIAM Academic Members and an application, is available at: www.siam.org/membership/academic.

SIAM Corporate/Institutional Members
Members receive:
• Discounted subscriptions to SIAM’s 16 journals, in print and/or electronic where applicable and as requested.
• Discount on Locus, SIAM’s online journal backfile archive.
• Up to 30% discount on all SIAM book purchases.
• Discounted registration fees at SIAM meetings for employees.

Other corporate options:
SIAM Sponsor
• Same recognition as members, but with no SIAM subscriptions.

SIAM Partner
For those who have a business relationship with SIAM
• Discounted registration fee at a SIAM meeting for an employee of your company.
• Free 100-word classified or announcement ad in any two issues per year of SIAM News.
• 15% advertising discount (not to be combined with any other discount except frequency of placement).
• 15% exhibit discount on booth or table space at one SIAM conference.

SIAM Affiliate
• 10% discount on individual journal subscriptions, 30% discount on book purchases.
• Up to 10 subscriptions to SIAM News.

More information about Corporate/Institutional Membership, including a list of current SIAM Corporate Members and an application, is available at: www.siam.org/membership/corporate.php.
