Contains research articles on the mathematics and applications of control theory and on those parts of optimization theory concerned with the dynamics of deterministic or stochastic systems in continuous or discrete time or otherwise dealing with differential equations, dynamics, infinite-dimensional spaces, or fundamental issues in variational analysis and geometry.

SICON treats the mathematical foundations of control and optimization as well as disciplines like mathematical finance that these have spawned.

SICON is published article by article at [http://epubs.siam.org/sicon](http://epubs.siam.org/sicon)
