

Publication information

ISSN: 1945-497X
(electronic only)
Frequency
Electronic: continuous
Publication to begin: 2010
2010 volume number: 1
Available format: Online

First issue publishing early 2010

Free and open access to all in inaugural year.

Editors-in-Chief

René Carmona, *Princeton University*
Ronnie Sircar, *Princeton University*

Brings together works on theoretical developments in financial mathematics as well as breakthroughs in the computational challenges they encompass. By publishing papers of high quality and originality, it serves as an essential resource for academic finance researchers and practitioners alike. The journal offers a conduit for the publication of articles in any of these branches of financial mathematics. It also provides a common platform for scholars interested in the mathematical theory of finance as well as practitioners interested in rigorous treatments of the scientific computational issues related to implementation.

On the theoretical side, the journal seeks papers with demonstrable mathematical developments motivated by models of modern finance. On the computational side, it publishes works introducing new methods and algorithms representing significant (as opposed to incremental) improvements on the existing state of affairs of modern numerical implementations of applied financial mathematics.

Information about editorial policy, peer review, manuscript submission, and production is available at www.siam.org/journals/sifin.php or email sifin@siam.org.
