SIAM Journal on
OPTIMIZATION

Linking Optimization Applications, Algorithms, Software, and Computational Practice

Editor-in-Chief
Jong-Shi Pang
University of Southern California

Publishes research articles on the theory and practice of optimization. The areas addressed include linear and quadratic programming, convex programming, nonlinear programming, complementarity problems, stochastic optimization, combinatorial optimization, integer programming, and convex, nonsmooth and variational analysis. Contributions may emphasize optimization theory, algorithms, software, computational practice, applications, or the links between these subjects.
